

tcp-congestion-ops:

PktsAcked(), GetSsThresh(),  
IncreaseWindow(),  
FastRetransmit(), FastRecovery()  
defined as base congestion control  
functionality

Shared Code:  
ReceivedAck() contains more functionality.  
Still calls all congestion control functions  
but Fast Retransmit and Fast Recovery  
are implemented here.

tcp-PktsAcked  
tcp-GetSsThresh  
tcp-IncreaseWindow  
tcp-FastRetransmit  
tcp-FastRecovery

Module all implementations of  
one algorithm

tcp-newreno,  
tcp-westwood(+), etc

Inherit components of  
congestion control
